

Project: **Rehabilitation of a combined sewer network at "Salzgitter Flachstahl GmbH"**

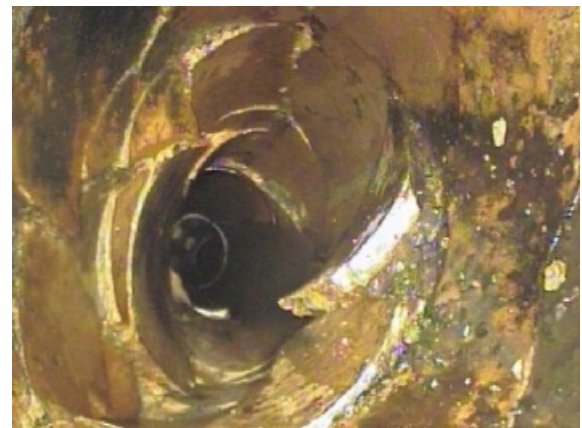

Client: Salzgitter Flachstahl GmbH  
Abt. TZW-Wasserversorgung  
und Abwasseranlagen  
Eisenhüttenstraße 99  
38239 Salzgitter  
Germany

Date: 2004 - 2006

### Project description:

Development of a rehabilitation concept based on analysis of the existing combined sewer by video camera recording of the present state of substance. In this context estimations of the cost and determination of rehabilitation methods were pointed out. The classification of rehabilitation sections were chosen in consideration of technical, economical and operational aspects.

### Services:

Concepts and design for rehabilitation
