

Project: **Flood protected construction of a drinking water reservoir at "Oberluch Roßlau"**

Client: LHW LSA
Landesbetrieb für Hochwasser-
schutz und Wasserwirtschaft
Sachsen-Anhalt
Sternstraße 59
06886 Lutherstadt Wittenberg
Germany

Project value: 550,000 €
Date: 2002 - 2005
Measures: 5 wells including energy supply,
drinking water pipe

Project description:

After replacement of the main high water dam at the polder area of "Oberluch" it was necessary to protect the existing drinking water reservoirs against high water. The final design comprises the reconstruction of 5 wells including energy supply and the construction of a drinking water pipe as well as a redesign of the approach ramp for vehicles.
