

Project: **High water protection at “Dessau-Waldersee”**

Client: Landesbetrieb für  
Hochwasserschutz und  
Wasserwirtschaft Sachsen-Anhalt  
Dessau/Wittenberg  
Sternstraße 59  
06886 Wittenberg  
Germany

Project value: 950,000 €  
Date: 2004  
Length: 613 m

Project description:

The high water dam at “Rehsumpfstraße” with a length of 613 m is constructed for traffic use.  
To protect the road against over-flooding under high water conditions, it was necessary to design a reinforced concrete flood wall with a height of 0,5 m (length 600 m) and to place new drainage canals.

Services:

HOAI § 55 LP 2 - 7, HOAI § 57, (German regulation for engineers) construction of a high water protection, drainage, road construction
