

Project: **Wolfsburg / Infrastructure design in front of the railway station**

Client: NILEG  
Niedersächsische Gesellschaft  
für Landesentwicklung und  
Wohnungsbau mbH  
Mailänder Straße 2  
30539 Hannover  
Germany

Project value: 6,000,000 €  
Date: 1998 - 2000  
Catchment area: 35,000 m<sup>2</sup>

Project description:

Due to the EXPO the site in front of the railway station was designed in new attractive way.

For the development of building sites a main municipal heating pipe (for 50,000 inhabitants) had to be placed to another site. It was also necessary to enlarge all roads in order to ensure higher bus traffic and plan the drainage network and road lightings.

Services:

HOAI § 55 LP 1 - 9, HOAI § 57, HOAI § 15 LP 4 - 9 (German regulation for engineers) road construction, road lighting, municipal heating system, drainage networks, surveying, project management
