

Project: **Bitterfeld - Bismarckstraße / SiGE-Co-ordination of safety and health protection measure**

Client: Abwasserzweckverband
Westliche Mulde
Berliner Straße 6
06749 Bitterfeld
Germany

AZV

Project value: 1,600,000 €

Date: 2005/2006

Project description:

Several building companies were involved to construct a main sewer line DN 1,000 mm by trench less tunnelling. Due to special risk potentials (cancer-causing substances) of the contaminated ground water it was necessary to coordinate safety and health protection measures (SiGe) to ensure an optimal construction progress for several complex works (heavy materials in deep shafts with diving works).

Services:

SiGE-Co-ordination of safety and health protection
